Learning Story Pages- How to use

This product is for single use only. All rights reserved not for resale or reproduction ©educatorsdomain if you would like more details on multiple licences for your service, please contact info@educatorsdomain.com.au

The Learning Story pages in these packs are designed to assist you in presenting your learning stories. Learning Stories form part of the Learning Journey of each child in your room so use them to write about the more meaningful learning experiences and to show the progress of the child's learning from the beginning of the experience to its conclusion.

Some Learning Stories can take place over weeks and if you are looking to write a longer learning story you can do so by duplicating page one of each of the different pages. These packs can also be used for smaller learning stories documenting special occasions, celebrations, awareness days, milestones and more. All images and text boxes can be resized or moved around to suit your own style. To insert images simply right click where it says, "Insert Image", then change image and choose the photo from your device.

The folder marked Learning Outcomes has all the outcomes for EYLF, MTOP,QKLG and VEYLDF. Simply copy and paste your chosen outcomes into the outcome section and write your more detailed analysis in the Analysis of learning section. Each template has text instructions to help guide you on what to write in each section.

These packs are designed to help save you time, to have them ready for children and families to view on a daily basis. These pages offer an easy to use format writing learning stories which are ready to go and to allow you to focus on the most important part of your day, engaging with children in your care.

The content of the story and the learning you are observing and planning for form the most important part of the Learning Story.
